Amrita Social Website

Ram Surya S

Nithin S

Nishanth S

Description

Brief:

A social website for Amrita university students. It consists of different features such as:

Photography:

Pictures and videos like short films can be posted, taken by aspiring photographers.

Blog:

Each and every person is good at something, so if they interested to share the experience of their life at Amrita , useful contents or life hacks which are helpful to other students. They can create it as a blog and post it on web, so that it will useful for the others in need.

Project Partner:

Project Partner is a space where if we are interested in something, and if we need to find partner for a group of same interest, this feature is for you.

Meme Section:

If you find a few memes funny and good enough, you can post it in this column, well apart from funny memes there are informative memes which can also be posted.

Quora:

Well if you have doubts regarding your subjects or something technical you always raise the query in quora , and if other people know what the solution is then they can answer. Once the query is solved then it will be helpful for the others to find out the solution if they have the same doubt.

Similar Interest:

Separate servers will be there for people who have similar interest in gaming (online tournaments will be conducted for gaming).

Alumni Section:

Alumni can share their college experience and their current work as blogs and also chat with students to act as a guide.

Events:

Now a days there are a lot of events happening, so u can post all the events which is sorted according to dates in the web

Fitness:

If u are a gym person, well you can post all the workout plans and diets which you are following which may be helpful for the others.

Amrita News:

In this column the latest news which is regarding about Amrita will be posted and updated on a daily basis.

Freshers Column:

Freshers column is a place where all the resources will be there like

.Hostel Information

.Map

.Senior guidance

. Study materials

. Reference books and many more.....

User Analysis

- > Students need a public platform within a University to showcase their skills and find people with common interests.
- > Instagram, Discord, Reddit and similar apps are used by very large audience from different countries which makes it difficult to find people with common interests near to us. Hence, a website for a particular university is needed.
- > Freshers need a platform to know more about the college(like hostel information), events, socialise with people etc.
- > Alumni can provide their experience of college, current work etc.
- > Users should be able to access the home page only after the login page, as the verification of college mail id is necessary.
- > The webpage should be compatible with mobile phones, as many access the webpage on the go.

- > The UI should consist of colours that young people like and should have animations for a smooth user experience.
- > The users should be able to setup their public profile for others to visit and follow.
- > There should be no premium content. Everything should be freely accessible to everyone.
- > The website should support dark mode.
- > There should be chat option to connect with people.
- > The user should be able to favourite their favourite content to remove unwanted content from displaying.
- > Any important information should be displayed highlighted in front page(unlike aums).
